

TO-DAY'S NEWS IN BRIEF.

BUSINESS.

Yesterday's bank clearings were \$5,824,415; balances, \$84,718. Local discount rates were between 4 1/2 and 6 per cent. Domestic exchange was quoted as follows: New York, 25c premium bid, 25c premium asked; Chicago, 10c premium bid, 10c premium asked; Cincinnati and New Orleans, par bid, 10c premium asked; Louisville, 25c discount bid, par asked. Wheat closed lower at 55 1/2c asked; No. 2 red, corn closed lower at 25 1/2c Sept.; No. 2 mixed, Oats closed at 23 1/2c asked Sept.; 25 1/2c No. 2 mixed. Spot cotton was unchanged in the local market.

WAR IN THE FAR EAST.

The Liao-Yang correspondent of the Bourse Gazette of St. Petersburg reports that the Japanese were repulsed with a loss of between 100 and 15,000 men in a three days' engagement Houtai-tze, but military experts at St. Petersburg believe the correspondent refers to the battle of Simou-Cheng.

A report is sent out from Nagasaki that Fort Arthur has capitulated, but the report is not confirmed from any point, and little credence is given to it.

The prize court at Vladivostok decides that the steamship Knight Commander, which was sunk by the Vladivostok squadron, was a lawful prize.

The Japanese sent gunboats up the Lalo River to cut off General Kuropatkin's retreat to the west.

A prisoner in the New Haven, Conn., jail is starving himself to death through remorse for having been arrested.

A passenger train collides with a crowded trolley car at Kansas City, killing one and injuring two.

Three hundred guests of the Gilt House, one of the oldest hotels in Louisville, Ky., are driven into the street by a fire at night.

Two autos of the New England party en route to St. Louis are wrecked near LaPorte, Ind.

LOCAL AND SUBURBAN.

Mrs. Florence Virginia Moss sues her husband for a divorce, claiming that he insisted upon hypnotizing her.

The Executive Committee has outlined a programme for September 15, St. Louis Day at the World's Fair.

Scotch Day at the World's Fair will be observed on August 15.

Twenty-five operators employed by the Terminal Association quit work yesterday.

GENERAL DOMESTIC.

The promotion of General Grant to command of the Department of the East surprises politicians who remember the strained relations formerly existing between him and President Roosevelt.

Panama proposes to invest \$6,000,000 in mortgages on first-class real estate in New York.

Missouri State University is urging farmers of the State to plant clover and cowpeas on worn-out lands, having proved the value of these crops as fertilizers by extended experiments.

A Missouri girl, preparing for suicide, writes express instructions for her burial. Old settlers of Montgomery County, Missouri, hold their annual reunion at New Florence.

A Lieutenant in the British Army returns to the Indian Territory and marries a girl who was his boyhood sweetheart.

Trade in grain in the United States has shown a considerable falling off in the last six months.

Experiments in ventilation of street cars show that the process is simple and the necessary changes easy to make.

The editor of the Manufacturers' Record says that it is essential to the prosperity of the country that some plan be devised for keeping up the price of cotton.

The New York saloon dedicated by Bishop Potter is prospering exceedingly, while protests at the Bishop's course come from all parts of the country.

A New York woman has made her home an asylum for cats, thereby incurring the marked displeasure of her neighbors.

Reports from the wheat fields of Nebraska, Kansas and Oklahoma show the wheat crop there 60,000,000 bushels short of last year's crop.

At Asbury Park, N. J., a robber puts his victim unconscious by the use of an electric battery and then relieves him of \$100.

James Jensen, a farm lad, sacrificed his life to save a passenger train near Carleton, Minn.

A youth at Springfield, Mo., admits attempted counterfeiting. He explains that it was his intention to build an orphan's home.

State Senator Foye of Georgia is arrested by Federal officers on the charge of holding negroes in bondage.

A New York woman offered the conductor of a street car 25 cents when he returned to her a purse containing \$1,000 which she lost.

FOREIGN.

The recent election of Councilors in France has resulted favorably to the Combes ministry.

A recent decision of the House of Lords has thrown members of the Free Church of Scotland into the utmost confusion, since it transfers property worth millions of dollars to small minority of the church.

England is preparing to build larger warships of both the battleship and cruiser classes than have ever before been constructed.

The oldest English paper in Paris has suspended publication.

Miss Mary Garden of Kansas City has been commanded to sing for the King of Greece.

Crime and insanity in Paris have been increased considerably by the recent intensely hot weather.

The steamer Frithjof has sailed from Vardø, Norway, for Franz Josef Land with coal for the American ship of the Ziegler expedition in search of the North Pole.

MARINE INTELLIGENCE.

Plymouth, Aug. 6.—Arrived: Friedrich der Grosse, from New York; New York, from New York.

New York, Aug. 6.—Arrived: Philadelphia, from Southampton.

Liverpool, Aug. 6.—Arrived: Locania, from New York.

Havre, Aug. 6.—Sailed: La Touraine, New York.

Glasgow, Aug. 6.—Sailed: Lakonia, Montreal.

Liverpool, Aug. 6.—Arrived: Tunisian, Montreal and Quebec.

Liverpool, Aug. 6.—Sailed: Etruria, New York.

Boulogne, Aug. 6.—Sailed: Hamburg, New York.

Moville, Aug. 6.—Sailed: Parisian, Montreal.

Southampton, Aug. 6.—Sailed: Germanic, New York, via Cherbourg.

Moville, Aug. 6.—Sailed: Columbia, from Glasgow, for New York.

London, Aug. 6.—Sailed: Meshaba, New York.

Cherbourg, Aug. 6.—Sailed: Germanic, from Southampton, for New York.

New York, Aug. 6.—Sailed: St. Paul, Southampton, via Plymouth; Umbria, Liverpool; Kronland, Antwerp, via Dover; Minnaha, London; Furnessia, Glasgow; Konigin Luis, Naples and Genoa.

Bremen, Aug. 6.—Sailed: Barbarossa, New York, via Southampton.

BRAZIL SHOWING THE WORLD MARVELS OF PROGRESS.

The Teeming Products of a Vast and Fertile Nation Furnish a Harmonious Picture at the Fair of the Country's Wonderful Development—Varied Treasures of the Land Demonstrated in Her Splendid Participation.

MANY DIRECTIONS FOR CAPITAL'S EMPLOYMENT INDICATED.

An epigrammatic visitor to the World's Fair, after seeing the picturesque display of Brazil, observed that that country was "making bullets in every corner of the Exposition." The casual observer, after viewing the wonderful display of the Brazilian Government at the World's Fair, might paraphrase the remark: "Brazil is making capital in every corner of the Exposition."

The whole intent and purpose of the marvelous showing of Brazil at the Fair is well epitomized in the laconic statement of Colonel Francisco de Souza Aguiar, the Brazilian Commissioner General to the World's Fair, that "Brazil has nothing to sell at the World's Fair, but has a great deal to show."

In every exhibit department save those of horticulture and machinery, Brazil has something to show. From almost every State of the vast 3,281,290 square miles of plateau in South America, one-fifth the area of the whole world, the great Brazilian Republic has sent samples of her varied and teeming resources.

With a total exhibit space of more than 2,500 square feet, and with 2,507 exhibitors contributing their best in competition with the rest of the world, the Brazilian exhibit is the crowning part of the whole exhibit of the World's Fair.

It is a taste and beauty in architecture which has been the admiration of the fairgoers. The structure, designed by Colonel Aguiar has been the admiration of the fairgoers. The structure, designed by Colonel Aguiar has been the admiration of the fairgoers.

THE DOMINION OF "KING COFFEE." "King Coffee" reigns in Brazil's agricultural exhibit. The luxuriant output of the delicious berry not only fills the greater part of the 4,541 square feet of space in the Palace of Agriculture allotted to Brazil, but sakes of it fill the basement of the classical national pavilion, on the verandas of which the hospitality of the commission is extended in the shape of aromatic coffee to all who would partake. More than a thousand exhibitors have contributed to Brazil's agricultural showing. Of these are exhibitors of coffee samples.

A great coffee trade of Brazil is shown exhaustively in the exhibit. Photographs, plans and models of her enormous coffee plantations, as well as the machinery for roasting and grinding the berry, abound. And the exhibitors confidently publish their challenge to be shown that coffee, that excels in shape, flavor, aroma and physical and chemical properties, the fruit of those great Brazilian plantations, is the cheapest to the consumer. From the world's coffee trade, Brazil is the largest producer. The United States took more of this coffee, 1,200,000 sacks, than any other country. Brazil's production of coffee in 1902 and 1903 was 10,588,000 sacks of 132 pounds each. This total output Brazil furnished 16,250,000 sacks, exporting to 12 foreign ports. The United States took more of this coffee, 1,200,000 sacks, than any other country. Brazil's production of coffee in 1902 and 1903 was 10,588,000 sacks of 132 pounds each. This total output Brazil furnished 16,250,000 sacks, exporting to 12 foreign ports.

But with coffee the tale of Brazil's agricultural resources is not told. The land is a land of plenty and her teeming products of an abundant soil fill the great exhibit space. Cocoa, tobacco, cigars, cigarettes, sugar, tea, mastic, beans, corn, feula, sirups, cordials, beer, wine, champagne, rum, alcohol, preserved meats, fish, canned fruits, biscuits, candies and host of other riches complete the tale.

RICHES OF LUXURIOUS FORESTS. Even the riches of Brazil have contributed to the display of samples from the forests which Aguiar, Humboldt, St. Hilaire and other eminent naturalists have pronounced the richest and most luxuriant in the world. Nearly 200 exhibitors have contributed to the display of samples from the forests which Aguiar, Humboldt, St. Hilaire and other eminent naturalists have pronounced the richest and most luxuriant in the world.

WOODS THAT NO OTHER FORESTS IN THE world produce are shown in abundance. The products of the forest which are used in naval construction. These are shown in the raw material, but there is also shown the finished products of the forest which demonstrate its value and artistic possibilities.

THE ECONOMIC WEALTH OF THE FORESTS as well as their commercial value for dyeing, tanning and for the extraction of oil and varnishes are shown by samples of bark, roots, resins, seeds and leaves. From the forest, rubber is obtained in many forms, including latex, gutta, and other commodities are manufactured.

THE BRASS OF PARA, Amazona and Matto Grosso, which in 1903 exported more than 30,000 tons of rubber, of which 14,000 tons went to the United States, has sent samples of the inexhaustible wealth of their rubber trees. The States of Maranhão, Ceará, Bahia and Alagoas, which export rubber, Mangabeira and Manicoba rubber, have sent samples of these products.

UNPARALLELED MINERAL WEALTH. In the mineral riches of the world, Brazil is surely not deficient, judging by the display made by this nation in the Palace of Mines and Metallurgy. Almost every State in the nation is represented by samples of its mineral wealth, the more complete catalogues which sound like a description of the wealth of King Solomon's mines. There are 3,897 square feet of space allotted to Brazil in this department, and 232 exhibitors display their wares.

In the list of the ores and mineral products of which there are samples shown, are gold, iron, copper, lead, zinc, manganese, asbestos, crystal, graphite, plumbago, mica, talc, soapstone, gneiss, diatomaceous and platiniferous sands, garnet, obsidian, calcareous clay, asphalt and argill, salt, and still the list stretches on.

CAPITAL IS OFFERED ITS GREATEST OPPORTUNITY in the siderurgical industries of Brazil. There are coal fields of unrivaled richness which only need to be developed. The backwardness of coal mining retards the working of the iron and other mining industries, as charcoal is used for the most part.

The blocks of coal from the States of Rio Grande do Sul and Santa Catharina exhibited in the display are ample proof of this and lay bare the black diamonds which exist in all the Southern States. Despite the lack of development of the iron industry, some very good samples of pig iron of the best quality are exhibited from Ipanema and Esperanza.

The exportation of manganese has steadily risen to the proportions of a great industry. It began in 1897, with a total exportation of 5,000 tons, which increased until, in 1903, it amounted to 181,000 tons. The highest development of this industry is shown by the exhibit. Many of the larger gold-mining companies now working mines in Brazil are represented by exhibits of sample ores, besides plans and models of their mines and machinery, and the by-products of the ores. Notable among them are the St. John del Rio Gold Mining Company, which exhibits a plan of its mines showing a section of the mines, showing where they are working 3,000 feet deep. This mine is in Morro do Ouro. The Ouro Preto Gold Mining Company of Parangama has an exhibition some samples of crystallized arsenic from its vastation furnaces, which the ores are worked. The exhibiting companies have sent to Brazil's mineral display blocks of gold ore weighing from one to three tons each.

That Brazil is one of the best-endowed countries in the world in the mineral kingdom would seem to be indicated when it is known that the very sands that are strewn along the strands and the waste places of the country are rich in minerals. From one kind are extracted the precious platinum and gold; from another, diamonds of commerce; from another, diamonds of jewelry; from another, diamonds of the monastic sands of the States of Espírito Santo and Bahia are extracted the valuable minerals. The thorium which is used in the manufacture of cells for the Auer incandescent lamps, while the bituminous

CAPITAL THE KEY TO OPEN MINES.

Rich in mineral deposits, her inexhaustible mines of iron, gold, copper, coal, manganese and other minerals only await the magic touch of capital to open and pour their riches into the lap of the investor. The magic touch of capital is wanted to extract the metal from ore and in place of the limited supply for local use that it obtains, the investor can obtain extraction to harvest the enormous quantities that the vastness of the country requires. Importation of capital is not then compete with the domestic output because of heavy duties and freight charges.

And besides her teeming mines, the plains, hills and valleys of this wonderful country are strewn with precious stones of a brilliancy and variety of color that rival the rainbow. In the eastern part of the State of Minas Geraes alone are found these stones: emeralds, green and red tourmaline, amethysts, andalusite and transparent tripstone. Here, too, the story of unworked treasures is repeated and only the open seams of capital is needed.

THE MANUFACTURING NATION OF LATIN AMERICA.

In the Brazilian section of the Palace of Varied Industries a revelation is in store for that visitor who has the impression that this country has nothing to manufacture to show. In the interior west corner of the main entrance, there is a richly decorated pavilion. This is Brazil's manufacturing exhibit. It is here that the days of European and American harvesting of their several manufactures, and the handicrafts of her artisans, are shown. The days of European and American harvesting of their several manufactures, and the handicrafts of her artisans, are shown.

THE DAYS OF EUROPEAN AND AMERICAN HARVESTING OF THEIR SEVERAL MANUFACTURES, AND THE HANDICRAFTS OF HER ARTISANS, ARE SHOWN. The days of European and American harvesting of their several manufactures, and the handicrafts of her artisans, are shown.

For Your Lawn

Keen Klipper Lawn Mowers—Run on ball bearings like a bicycle and make grass cutting a pleasure. Keen Klippers not only cut well but wear well, and are cheaper in the long run than any lawn mower made. Sizes 12 to 20 inches. \$6.50 to \$13.00. Other kinds \$2.50 to \$5.50. Grass Catchers—For any size mower—made of striped canvas—50c to 80c.

Grass Hooks—20c to 50c. Grass Shears—25c to 75c. Our Best Cotton 3-inch Rubber-Lined Hose is a first-class hose at a very reasonable price. It is tested for heavy pressure and fully guaranteed. The cotton covering insures long wearing qualities. Price for 25 feet, complete with couplings and nozzle, only \$5.00. Or 25 feet for \$2.50, with extra charge for couplings.

Grass Hooks—20c to 50c. Grass Shears—25c to 75c. Our Best Cotton 3-inch Rubber-Lined Hose is a first-class hose at a very reasonable price. It is tested for heavy pressure and fully guaranteed. The cotton covering insures long wearing qualities. Price for 25 feet, complete with couplings and nozzle, only \$5.00. Or 25 feet for \$2.50, with extra charge for couplings.

Grass Hooks—20c to 50c. Grass Shears—25c to 75c. Our Best Cotton 3-inch Rubber-Lined Hose is a first-class hose at a very reasonable price. It is tested for heavy pressure and fully guaranteed. The cotton covering insures long wearing qualities. Price for 25 feet, complete with couplings and nozzle, only \$5.00. Or 25 feet for \$2.50, with extra charge for couplings.

Grass Hooks—20c to 50c. Grass Shears—25c to 75c. Our Best Cotton 3-inch Rubber-Lined Hose is a first-class hose at a very reasonable price. It is tested for heavy pressure and fully guaranteed. The cotton covering insures long wearing qualities. Price for 25 feet, complete with couplings and nozzle, only \$5.00. Or 25 feet for \$2.50, with extra charge for couplings.

Grass Hooks—20c to 50c. Grass Shears—25c to 75c. Our Best Cotton 3-inch Rubber-Lined Hose is a first-class hose at a very reasonable price. It is tested for heavy pressure and fully guaranteed. The cotton covering insures long wearing qualities. Price for 25 feet, complete with couplings and nozzle, only \$5.00. Or 25 feet for \$2.50, with extra charge for couplings.

Grass Hooks—20c to 50c. Grass Shears—25c to 75c. Our Best Cotton 3-inch Rubber-Lined Hose is a first-class hose at a very reasonable price. It is tested for heavy pressure and fully guaranteed. The cotton covering insures long wearing qualities. Price for 25 feet, complete with couplings and nozzle, only \$5.00. Or 25 feet for \$2.50, with extra charge for couplings.
